

Regulatory and Corporate Compliance

Today's executives have more concerns than their predecessors ever had. Not only must they be concerned with revenue growth, profitability, competitor threats, but also meeting the strict requirements of governance and regulatory compliance. These regulations touch almost every area of business operations, yet all have common threads through IT systems compliance and performance.

Costs for meeting compliance requirements impact all projects and extend implementation timing. Well managed organizations gain benefits from increased compliance - rigor, discipline, standards, and control that drive performance and benefits.

How can you meet the requirements and gain benefits from regulatory compliance?

Deer Park Group brings knowledge of compliance, regulatory plans and filings with unparalleled experience in IT operations and processes. Our mission is to help clients make more informed decisions that improve program effectiveness, reduce risk and improve overall business quality while achieving regulatory compliance.

Deer Park Group's familiarity and understanding with this area is broad and extensive. Our experience includes:

- Developing plans and certifications within IT ensuring compliance in areas of:
 - Healthcare (HIPPA)
 - Banking (FDIC, state regulators)
 - Corporate (Sarbanes-Oxley)
- Personal Confidential Information
 - Remediation of unencrypted process steps (Gramm Leach Biley and California SR 1386)
 - Development of Incidence Response Plans
- Governance of all business process including:
 - IT process management
 - Financial Internal Controls
