

DEER PARK GROUP SOLUTIONS

SOLUTIONS FOR COMPLEX BUSINESS PROBLEMS

The Deer Park Group and its team of professionals are an essential resource for managing significant transitions, achieving strategic goals and management improvement.

Organizations must confront significant business challenges on a continuous basis that are critical, strategic issues; from acquisitions to major technology projects, private-to-public, national-to-global, and senior management transitions.

Often key management has limited time available and may have little experience in the wide variety of challenges confronting a growing organization. Organizations need executive talent matched to their industry and specific challenges, available on a flexible schedule to get through the transition, prepared to manage in the new environment.

Deer Park Group provides professional, senior level management leadership to assist and guide organizations to meet significant challenges.

Our executive professionals have held senior level positions in leading global organizations, are recognized leaders in their industries and often have directed or participated in industry-wide leadership. They have successfully confronted significant challenges similar to the challenges facing your organization. These challenges include the integration aspects of mergers and acquisitions, business turnaround, major and complex system project rescue, and technology and business process innovation.

Deer Park Group has expertise in leading organizations through complex transitions and preparing for long-term growth. This includes both IT and financial management experience, augmented by various areas of subject matter expertise in this strategic alignment process.

Deer Park Group executive resources are flexible to your organization's scheduling, location and budget requirements. They have specific experience in your challenges and have often held the leadership position in organizations like yours.

Typical engagements for Deer Park Group consultants include; Advisory Board, Strategic Planning, Corporate to Business Function alignment, Pre and post merger assessments, and Complex project rescue and leadership.
